Wilhelmi, R. and Schulze, K.
**EFFECT OF WATER ON ADHESION OF BINDERS
 TO SOLIDS.** Pt. 2 of Boundary Surface Processes in
 Water-Bituminous Binder Systems and their Importance
 in Construction Practice. (1960) 34p. (23 figs. omitted)
 8 refs.
 Order from SLA m\$3.00, ph\$6.30 61-10208

Trans. of Bitumen, Tar, Asphalt, Resin (und-
 Verwandte Stoffe) (West Germany) 1955, v. 6 [no. 1]
 p. 12-20.

The process of rupture of the closed binder film over
 immersion in water has been observed under the
 microscope. First water penetrates through the closed
 binder film to the solid body, where it collects in the
 form of minute bubblelets. In some binders, the thinner
 film over such a bubblelet then ruptures, thus giving the
 water direct access to the solid. Then only is there
 visible binder displacement (pushing aside), to a
 degree of loss depending on the binder.
